PROFESSIONAL EXPERIENCE

Top Manager

May 2024 – Present (6+ months, 40 hrs/week – Ongoing)

Enterprise Project, Task & Resource Management Platform + Secure Team Chat & AI Assistant

Full-Stack SaaS | 100+ Active Users | Multi-Industry (Construction, Consulting, Logistics)

React.js • Vite.js • Redux Toolkit • Tailwind CSS • Headless UI • Node.js • Express.js • MongoDB • Docker • Flutter (Mobile Chat) • Firebase • WebSocket • AI Task Reminders

- Architected a unified platform managing projects, tasks, human & material resources, time tracking (pointage), payroll (fiche de paie), invoicing (devis/factures), client portal, and meeting scheduling.
- Developed secure real-time team chat using Flutter (iOS/Android) with end-to-end encryption, file sharing, and message history sync.
- Built AI-powered task & meeting assistant that sends smart reminders (due dates, conflicts, overdue tasks) via push notifications and in-app alerts.
- Implemented RBAC (5 roles), live pointage with GPS validation, and automated payroll + PDF export (fiche de paie, devis, factures).
- Designed MongoDB aggregation pipelines for real-time dashboards: resource utilization, budget vs actual, delayed tasks.
- Deployed with Docker + CI/CD; achieved <1.5s FCP and 90% reduction in payroll processing time.
- Integrated Flutter chat with backend via WebSocket + Firebase Auth for cross-platform secure communication.
